

Single issue verification

A\$249 One-off

You have one specific behaviour, failure or result that needs an independent check.

THE STANDARD SCOPE

One agreed software issue: investigation, evidence and practical next steps.

WHAT YOU RECEIVE

- A clear account of the issue, expected behaviour and agreed boundaries.
- Relevant checks and evidence showing what was established and what remains uncertain.
- A concise written finding with practical next steps.

SCOPE AND TIMING

Covers one agreed issue. Additional issues, broader system work and implementation are quoted separately. A fix or a clean result is not guaranteed.

Enquiries are accepted 24/7. Work starts and delivery times are agreed after we receive the required inputs and confirm the scope.

START WITH A SHORT ENQUIRY

Tell us the issue or workflow and what you expected versus what happened. Add a public link if useful. No repository access is needed for the first enquiry.

Ask about the A\$249 check

Or email tim@oc-labs.com.au. Private code is shared later by agreement.

PROOF YOU CAN INSPECT

Micopay accepted PR #34: a schema-parity regression check and a decimal column correction. The public change and review show the work and its limits.

This is an accepted open-source contribution, not a paid-client testimonial or endorsement of our services.

Read the accepted Micopay change | View our evidence

Standard quotation package. Scope, inputs, start time, delivery time and payment terms are confirmed in writing before work starts. Limited evidence may leave findings inconclusive; reproduction or a fix is not guaranteed.

All prices are in Australian dollars and are the total standard-scope price, including any applicable GST.

Verification sprint

A\$2,800 One-off

A workflow has several connected behaviours or needs more depth than a single issue check.

THE STANDARD SCOPE

One agreed workflow or system slice: deeper investigation, repeatable checks and a written report.

WHAT YOU RECEIVE

- An agreed verification question, workflow boundaries and inputs.
- Deeper investigation with repeatable checks for the agreed workflow or system slice.
- A written report of evidence, uncertainties and prioritised next steps.

SCOPE AND TIMING

Covers the agreed workflow or system slice. It is not an unrestricted whole-system audit. New scope and implementation are quoted separately; findings are limited to the work agreed and evidence available.

Enquiries are accepted 24/7. Work starts and delivery times are agreed after we receive the required inputs and confirm the scope.

START WITH A SHORT ENQUIRY

Tell us the issue or workflow and what you expected versus what happened. Add a public link if useful. No repository access is needed for the first enquiry.

Scope the A\$2,800 sprint

All prices are in Australian dollars and are the total standard-scope price, including any applicable GST.

Weekly issue retainer

A\$100 / week Weekly

You need a regular independent check of one small, specific software issue each week.

THE STANDARD SCOPE

One small, clearly scoped software issue per week; scope is accepted before work starts, and additional or larger work is quoted separately.

WHAT YOU RECEIVE

- Scope confirmation for one small issue in the agreed service week.
- An independent investigation with supporting evidence.
- A concise finding and recommended next action.

SCOPE AND TIMING

Covers one accepted small issue per week, not unlimited or emergency support. Billing starts only by explicit agreement, never from an enquiry. Cancel before the next agreed weekly period to stop future charges.

Enquiries are accepted 24/7. Work starts and delivery times are agreed after we receive the required inputs and confirm the scope.

START WITH A SHORT ENQUIRY

Tell us the issue or workflow and what you expected versus what happened. Add a public link if useful. No repository access is needed for the first enquiry.
